

BEARER WIPERS

A compact and fully adaptable design

The perfect cylinder maintenance

The bearer wipers designed by Tecnocut allow to perform the **cylinder maintenance in a very easy way**. They **effectively and consistently lubricate** the cylinder tracks.

- Its magnetized base its **easily positioned inside the machine structure**.
- Thanks to its compact design it can be **used in cutting stations with different size rollers**.
- The grease plush tank is located on a stem that helps to **place it at the desired distance from the bench**.

BEARER WIPERS

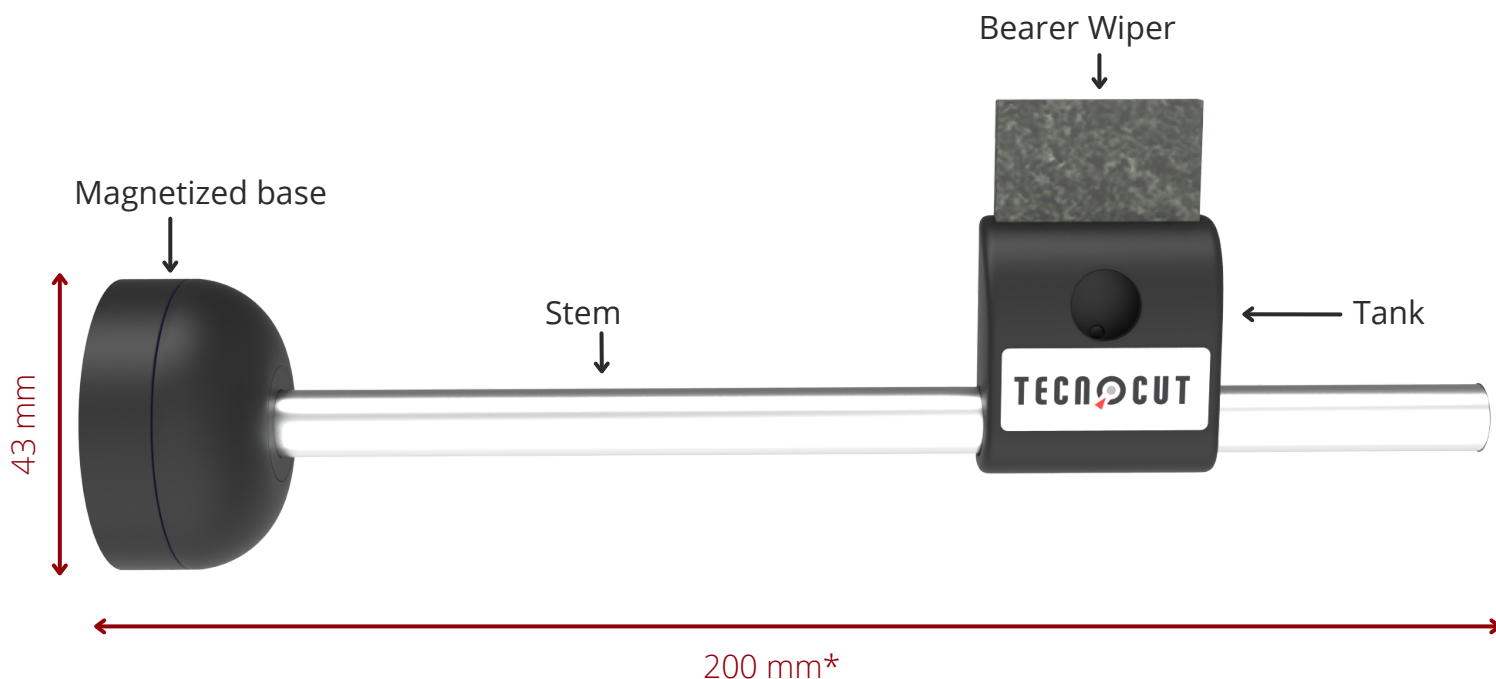

The cylinder maintenance has never been this easy

This is how our bearer wipers work

With the bearer, keeping your dies in good condition is very easy:

1. **Tighten the screws of the bearer wiper on the stem**, at the distance of the bench that you need.
2. **Fill the lubricant reservoir and attach the magnetic base** of the bearer wiper.

STRUCTURE

*The length of the stem can be reduced by the user by making a cut to the end of the stem
